

Etihad Cargo receives IATA CEIV Pharma certification

A Monitor Report

Date: 01 December, 2022

Abu Dhabi: Abu Dhabi-based cargo airline Etihad Cargo has received IATA CEIV Pharma certification, ensuring adherence to national and international standards throughout the entire pharmaceutical transportation process.

Etihad Cargo will also become the first airline in the Middle East, and one of only three carriers globally, to hold the trio of CEIV Pharma, CEIV Fresh, and CEIV Live Animals certifications.

IATA launched the CEIV Pharma certificate in 2014 with the aim of guaranteeing excellence in the transportation of pharmaceuticals, specifically in an air cargo context. It brings together best practices from a variety of organisations, including IATA, the World Health Organisation (WHO), and the European Union.
