

SalamAir enhances travel flexibility with launch of new services

- A Monitor Report

Date: 01 January, 2025

Muscat : SalamAir, Oman's low-cost airline, has launched three products designed to enhance our passenger's travel experience. Starting January 2025, SalamAir will be offering Express Bag, Priority, and Online Check-In services, providing travelers with more flexibility and options to tailor their journeys to suit their individual needs. These services will be available for bookings made through all of SalamAir's booking channels.

SalamAir is focused on reinventing its approach to travel and is introducing a lower fare structure that provides passengers greater opportunities to save on travel costs. As part of this change, passengers can now save from the cost of travel by checking in online.

SalamAir is introducing two other innovative products: Express Bag and Priority.

Passengers can book this product to ensure their bag is among the first to arrive at their destination. They can also choose to take an extra 10kg bag free on the plane along with the 5 kg hand baggage each pax carries.
