

## Turkish to operate A350 flights to Dhaka in April, May

- A Monitor Desk Report

Date: 15 April, 2025

**Dhaka: Turkish Airlines will deploy brand-new Airbus A350-900 aircraft on multiple flights of its once-daily service to Dhaka from Istanbul in April and May.**

As a circular from the airline reads, the A350 flights will be operated on April 29-30 and May 1-4, 6, and 10.

At present, Turkish Airlines operates the Dhaka-bound TK712 and return TK713 flights with Airbus A330s. The introduction of the A350 is aimed at enhancing this service further.

The A350 features customized ambient lighting, spacious seating, and high ceilings, and thanks to its carbon-fiber-reinforced polymer-built fuselage, it enables optimized cabin pressure for a more relaxing journey and large panoramic windows that enhance the overall travel experience.

Turkish Airlines, the Turkish flag carrier, is an Istanbul-based full-service carrier. The airline currently serves 286 destinations worldwide, becoming the fourth largest airline in this regard.
