

7 Bangladeshi participants become winners at Rosatom's Global Atomic Quiz

- A Monitor Desk Report

Date: 30 November, 2024

Seven participants from Bangladesh have become winners at the fifth Global Atomic Quiz competition organized by Russia's State Atomic Energy Corporation (ROSATOM).

The quiz was conducted both online and offline, attracting 25,000 science enthusiasts from 100 countries. A total of one hundred participants were declared winners this year, including seven from Bangladesh. They will be offered the opportunity to visit Russia. The result of the quiz was recently announced on the Global Atomic Quiz website.

Rosatom organized the Global Atomic Quiz 2024 in celebration of World Science Day on November 10. It is not just a popular science quiz but a truly global educational project that explains the basics of nuclear physics, shows the importance of nuclear technologies in everyday life,

and highlights the role that nuclear plays in preserving our fragile planet.

The online quiz was conducted in 13 languages: English, Russian, Bengali, Hungarian, Spanish, Portuguese, Kyrgyz, Kazakh, Mongolian, Turkish, Uzbek, Arabic, and Indonesian.

The participants had to answer 25 questions of varying difficulty and topics. The questions were in five distinct groups, each highlighting one of the major spheres of nuclear applications: “Energy and environment”, “Nuclear science”, “Industry and transport”, “Health”, and “Food and agriculture”.

All participants received a digital certificate, while winners will be awarded a unique prize- an atomic puzzle.

Reference

The educational activities of Rosatom are aimed at a broad audience. The goals of its scientific outreach projects, in addition to popularizing atomic technologies, include increasing access to knowledge about science and technology as a whole and enhancing the appeal of scientific and technical education and engineering specialties. The educational infrastructure network created by Rosatom includes 25 information centers for atomic energy in Russia and abroad, which attracted over 280,000 visitors in 2023.

Global Atomic Quiz is not just a popular science quiz but a truly global educational project that explains the basics of nuclear physics shows the importance of nuclear technologies in everyday life, and highlights the role that nuclear plays in preserving our fragile planet. Since its launch in 2020, the Global Atomic Quiz has been conducted in more than 11 languages and has attracted over 40,000 enthusiasts from 70+ countries. In 2023, the quiz became a prize winner of the IX All-Russian award “For Fidelity to Science” in the category “Science for the World”.
