

Emirates to deploy retrofitted A380s on Manchester and Milan routes

- A Monitor Desk Report

Date: 10 April, 2025

Dubai: Emirates will be introducing its newest Airbus A380s fitted with its latest cabins, including Premium Economy, to Manchester and Milan. The latest retrofitted A380s will operate to Manchester from 6 June, and to Milan from 1 July.

With the introduction of Emirates' newly retrofitted A380 to Manchester, the airline will expand its Premium Economy offering to nearly 5,000 weekly seats in and out of the UK from June. The enhanced service to Manchester complements the four-daily retrofitted A380s currently serving the Dubai-London Heathrow route,

Milan will become Emirates' second Italian gateway to offer the airline's latest cabins and Premium Economy seats following the planned deployment of the airline's A350 to Bologna later in June.

These additions will expand Emirates' network of retrofitted A380 destinations to 19 global points.

On a four-class Emirates A380, the Premium Economy cabin is located at the front of the main deck with 56 seats. Each seat offers generous pitch and width for working and relaxing, as well as customized features like in-seat charging points and a side cocktail table. The onboard experience is rounded off with meticulously selected in-flight amenities, a curated menu, and extensive beverage options.
