

Emirates to operate one-way passenger flights from UK

- A Monitor Desk Report

Date: 01 February, 2021

Dhaka: Dubai-based airline Emirates to resume their passenger flights from the United Kingdom from February 2 following temporary suspension. These flights will be one-way only.

"From February 2, 2021, we will operate passenger flights to Dubai from London Heathrow and Manchester," Emirates said in a notice.

In an update on its website, Emirates said customers looking to leave the UK should be aware of quarantine arrangements that may face them at their destination.

"Customers seeking to leave the UK on these services should ensure that they are authorised to travel under the latest UK government rules, and meet the travel requirements of their final destination," the airline added in the notice.

On January 29, Emirates suspended its flight operations between UK and Dubai after the United Kingdom government banned passenger flight operations to and from the United Arab Emirates to contain the spread of the new strain of coronavirus.

Emirates currently operates two flights a day from Dhaka.
