

Emirates to reintroduce daily non-stop Hong Kong flights

- A Monitor Desk Report

Date: 19 January, 2023

Emirates will ramp up frequencies to Hong Kong with a daily non-stop service from its Dubai hub, starting from 29 March 2023, adding to its existing daily flight from Dubai to Hong Kong via Bangkok and increasing the airline's operations in the market up to 14 weekly flights.

The resumed service will provide more capacity, choice and flexibility for travellers, as the airline continues to expand its global operations in line with sustained demand for international travel.

Operated by an Airbus A380 aircraft, Emirates' flight EK380 will depart Dubai at 10:45hrs and arrive in Hong Kong at 22:00hrs. The return flight EK381 will depart from Hong Kong at 00:35hrs and arrive in Dubai at 05:00hrs. All times are local.

By bringing back its Dubai-Hong Kong flight EK380/EK381, Emirates is responding to the growing demand on the route and offering travellers the choice to fly non-stop or break their journeys in Bangkok.

Tickets can be booked on [emirates.com](https://www.emirates.com), the Emirates App, or via travel agents. Travellers are also encouraged to check the latest entry requirements.

As one of Emirates' key Asian destinations, the airline reaffirms its commitment to supporting Hong Kong's post-pandemic recovery, increasing capacity to serve travellers originating from Dubai or connecting in Dubai from other cities in its global network. Throughout the pandemic, Emirates has supported the market's local community by maintaining the trade links between Hong Kong and other strategic markets within its network, successfully transporting imports and exports through its airfreight division, Emirates SkyCargo.

Emirates also provides increased connectivity for travellers to additional destinations beyond Hong Kong through its interline agreements with Cathay Pacific and HongKong Airlines, among others.

The Emirates A380 experience remains highly sought after by travellers for its spacious and comfortable cabins, and signature products that offer travellers the best experiences in the sky like the Onboard Lounge, First Class suites and Shower Spa. The A380 experience is always rounded off by award-winning hospitality, regional culinary creations and authentic tastes, and the airline's award-winning inflight entertainment system, ice, with more than 5,000 channels of on-demand entertainment at every customer's fingertips.

Emirates currently deploys its flagship A380 to 40 destinations worldwide including London Heathrow, Sydney and Houston. The airline's iconic double-decker will be serving nearly 50 destinations by the end of this summer.
