

## Emirates to serve all three flights to Riyadh with upgraded Boeing 777s

- A Monitor Desk Report

Date: 18 March, 2025

Dubai: Emirates plans to introduce newly retrofitted Boeing 777s on its second and third daily flights between Dubai and Riyadh, starting from 30 March and 7 May respectively. The newly refurbished Emirates Boeing 777, featuring the airline's best-in-class products, was first introduced to Riyadh in October 2024.

The planned upgrades to the retrofitted Boeing 777s will make the Kingdom's capital the first in the Middle East/GCC and among one of the few destinations in the airline's network to be served exclusively with its latest retrofitted aircraft.

The latest refurbished Emirates Boeing 777s include Premium Economy seats arranged in a 2-4-2 layout, offering enhanced comfort and space. The upgraded Business Class cabin features a 1-2-1 configuration with direct aisle access, providing even more privacy and convenience.

Emirates' refurbished aircraft also boasts First Class suites and a refreshed Economy Class cabin.

In November 2024, Emirates also introduced Chauffeur-Drive Services (CDS) in Riyadh, offering First and Business Class passengers a premium door-to-door journey. Riyadh is the first and only regional destination offering CDS for premium customers, and Emirates is the only airline exclusively offering this service in Riyadh.

The airline currently operates 72 weekly flights to all four gateways in Saudi Arabia on a mixed fleet of Boeing 777s and A380s.
