

Emirates to trial new mobile app to facilitate pre-travel COVID-19 requirements

- A Monitor Desk Report

Date: 01 February, 2021

Dubai: Emirates airline has partnered with GE Digital Aviation Software and TE-FOOD to trial TrustOne, a mobile app that allows passengers to undergo COVID-19 PCR tests at special discounted rates. The app also helps passengers adhere to the latest regulations and protocols, making travel seamless and more convenient.

When using the app, Emirates customers with an upcoming flight booking will be offered special rates for COVID-19 PCR tests through Eurofins—one of the global independent market leaders in testing and laboratory services—at one of its global lab facilities. Passengers can also manage all related information in one place, including finding lab locations, booking of appointments, and test results with minimal additional data entry needs.

The app will first be launched as a trial, and the first phase has commenced in the UAE, France, UK, Spain, and the Netherlands. The trustee app is now available for download on iOS or Android devices.
