Jeddah airport introduces 70 e-gates

- A Monitor Desk Report   Date: 03 March, 2025

Riyadh: Jeddah airport has introduced state of the art e-gates to automate check in and departure procedures.

Inaugurated by Deputy Emir of the Makkah Region Prince Saud bin Mishaal, the AI powered system, at King Abdulaziz International Airport in Jeddah which includes 70 E-gates improves the airport's efficiency to handle up to 175,000 passengers daily.

The system features 70 e-gates aimed at streamlining travel by automating check-in and departure processes, offering passengers a more seamless and efficient airport experience.

The initiative leverages modern technologies and artificial intelligence to facilitate faster and more secure passenger processing. The e-gates are distributed across Terminal No. 1 and the Executive Office facilities, each capable of handling up to 2,500 passengers. This system

significantly boosts the airport's capacity, enabling it to serve up to 175,000 travelers per day.

King Abdulaziz International Airport is the third in Saudi Arabia to implement the e-gate system, following its successful deployment at King Khalid International Airport in Riyadh and Neom Bay Airport.

The expansion of this advanced system aligns with the Kingdom's commitment to enhancing airport efficiency, passenger convenience, and technological innovation in line with Vision 2030.
