

## Pacific Motors launches all-new Nissan Almera

- A Monitor Desk Report

Date: 03 July, 2022

Pacific Motors launched the all-new Nissan Almera in Bangladesh through a ceremony held at its Tejgaon showroom premises in Dhaka on Saturday (June-2). Ambassador of Thailand in Bangladesh Makawadee Sumitmor graced the occasion as the chief guest and unveiled the awe-inspiring model.

Pacific Motors Managing Director Intekhab Mahmud, Deputy Director Farzana Khan, Assistant Director Md Najimul Haque and other directors, department heads and senior officials of the company were also present at the launching ceremony. Nissan introduced the powerful 1000cc Turbo sedan car that offers smooth and confident driving experience, with a distinctive and excellent presence projecting a new style statement on the streets.

It might be mentioned that, the all-new Nissan Almera is re-imagined under Nissan's 'Emotional Geometry' design language. Every corner, crease and curve of the all-new Nissan Almera worked together to create something spectacular featuring 1.0 Litre Turbo Engine that has a maximum power output of 100PS and high torque of 152Nm at a low of 2,400 to 4,000 rpm.

Intelligent Around View Monitor (IAVM) with Intelligent Moving Object Detection (IMOD) is a perfect solution for driving during parking and manoeuvring tight

spots.

The IAVM uses 4 cameras that provide an on-screen virtual 360± bird's-eye view of the vehicle (as well as 3 other angle views), while the IMOD system helps to detect and alert the driver of moving objects surrounding the vehicle.
