

Singapore Airlines offers complimentary Wi-Fi

- A Monitor Desk Report

Date: 06 June, 2023

Dhaka: Singapore Airlines announced that, effective July 1, 2023, the carrier will be offering complimentary unlimited in-flight Wi-Fi access for customers in all cabin classes, including Premium and Economy.

The move makes Singapore Airlines the first to offer complimentary unlimited Wi-Fi to every passenger in all cabin classes, not just those who have purchased the most expensive air tickets or are aligned with certain mobile carriers.

On the occasion, Yeoh Phee Teik, Senior Vice President—Customer Experience, Singapore Airline, said, “In today’s increasingly hyper-connected world, high-speed in-flight Wi-Fi connectivity is one of the most important requirements for our customers.”

“Giving them access to free unlimited Wi-Fi is yet another milestone in SIA’s continuous effort to offer an exceptional end-to-end travel experience,” Teik added.

It may be mentioned here that Wi-Fi access will be available fleet-wide except onboard its seven Boeing 737-800 NG planes, which are not Wi-Fi enabled.
