

Technical issue halts intl'l departures at Chennai airport

- A Monitor Desk Report

Date: 04 October, 2023

Chennai : A server problem led to disruption in services at the international departure at the city airport here on Wednesday (September 4), affecting 9 outbound services and about 1,500 international passengers, officials said.

The technical issue that was noticed around 1.30 am was fixed by 6 am, they said.

Only international departures were affected, impacting printing of boarding passes and baggage handling, officials added.
